PROFESSIONAL SUMMARY

Final-year B.Sc. Computer Science student at FING (UdelaR), graduating within the year, with hands-on experience in fullstack web development and daily professional communication in English with international enterprise clients. Eager to grow into mobile development through hands-on work. Quick learner with a proven track record of ramping up on new technologies under pressure — comfortable working independently in remote, fast-moving environments.

PROFESSIONAL EXPERIENCE

Directory Services Support Engineer

Tata Consultancy Services | Client: Microsoft | 03/2022 - 05/2023

- Collaborated daily with international clients in English in a high-demand, multicultural remote environment.
- Automated troubleshooting processes with scripts, reducing resolution times.
- Worked with authentication systems (Active Directory, IAM) in large-scale distributed environments.
- Joined the team with minimal knowledge of Active Directory and reached production level within weeks, handling real enterprise client cases independently.

EDUCATION

B.Sc. Computer Science — Final Year

Faculty of Engineering, 2022 - Present

Focused on systems, networks, software development, and distributed architectures.

PROJECTS

App de Spots Outdoor – (in development)

FastAPI · React · Tailwind CSS · SQLite · SQLAlchemy · NextAuth.

- Fullstack app to discover and share outdoor spots in Uruguay (hiking, climbing, etc.)
- Interactive map with geolocation and geospatial filtering — users explore spots by location, category, and activity.
- User authentication with session management and persistent data via SQLAlchemy + SQLite.
- REST architecture with FastAPI backend and React + Tailwind frontend. Clean architecture with clear separation of concerns.
- Planning mobile version with React Native as next step.

AI Automation & Agent Workflows (Personal Projects)

n8n · LLMs · AI Agents · RAG · REST APIs

- Designed and implemented automation workflows using n8n and AI agents to automate repetitive tasks and business processes.
- Built agent-based systems integrating LLMs, external APIs, vector stores, and retrieval-augmented generation (RAG) techniques for knowledge retrieval and automated decision support.
- Worked with modern AI tools and coding assistants including ChatGPT, Gemini, Claude, and GitHub Copilot to accelerate development and experimentation.

SKILLS

React | Python (FastAPI) | JavaScript/TypeScript | REST APIs | SQL/PostgreSQL | HTML/CSS/Tailwind | Agile methodologies |
Git & collaborative workflows | n8n & AI agents automatization

LANGUAGES

Spanish: Native | English: Advanced | Portuguese: Intermediate
